

Learn. Discover. Interact.

mcr and Blue Coat invite you to join us for an interactive and compelling breakfast briefing.

Learn and discover how you can benefit from Blue Coat's Application Delivery Network (ADN) infrastructure that optimises and secures the flow of information to any user, on any network, anywhere.

Learn how monitoring and reporting of your IT environment help to increase performance of your business critical applications and WAN solutions.

You will also find out:

- How "ADN" accelerates application performance, increase application visibility, improve performance and security across your WAN;
- How to free up your resources and use them in a more effective strategic way;
- What are the long term benefits of a strategic partnership between Blue Coat and mcr?

Your main takeaways will be:

- Contain and manage costs
- Enhance business productivity
- Respond quickly and effectively to changing business requirements

Referral: Enter the draw to win the latest iPod touch if you refer a colleague to register and attend the breakfast briefing.
